

Upcoming early morning and daytime work near homes and parks in South Park

Lower Duwamish Waterway Cleanup Construction

Upcoming work near South Park

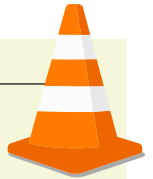

This fall, cleanup crews will be doing in-water work near Duwamish River People's Park at sediment management areas 12A and 12B (see map below). We expect activity to begin at cleanup area 12A as soon as **October 1**.

Additionally, crews will be working on the waterway downstream (north) of the South Park Bridge at sediment management area 16 (see map below) near residential areas of South Park.

- ▶ The work will take place during the daytime beginning as soon as **October 2**. On most days, work may start as early as **6 a.m.**
- ▶ During the week of **October 12**, cleanup construction may begin as early as **3 a.m.** This 3 a.m. start time is due to tidal schedule and will only last about one week.

Crews will not work on Sundays. Schedules are subject to change. During this time, you may hear noise from construction equipment and see lights for safe work.

If you have questions or concerns, please contact the Lower Duwamish Waterway Group at info@ldwg.org or 1-888-LDWG. Visit ldwg.org to sign up for regular construction updates.

Daytime work will occur at sediment management area 12A, 12B, 16, 17, and 18 as shown on this map.

This construction season, the South Park-based contractor, Pacific Pile and Marine, will be dredging contaminated sediment near homes and parks in South Park. The community can expect multiple barges and equipment working on the water, lights for safe work during dark hours, and typical construction equipment noise.

Call or email the outreach team with your questions or concerns.
