Cleanup Construction Activities

Season 3 construction of the upper reach, the two most upstream miles of the Lower Duwamish Waterway Superfund site, will continue through February 2027. In-water construction is limited to October 2026 through February 2027 to protect certain fish species.

Construction will occur on weekdays and Saturdays. It will occur during both the daytime and nighttime. Work hours will vary depending on tides and the type of work being done. Please note that in-water construction activities are dynamic and weather-dependent. All schedules are subject to change. **Visit LDWG.org for the most up-to-date information.**

If you have questions, or concerns, you can reach our team at **info@ldwg.org** or 1-888-561-LDWG (1-888-561-5394).

Map of Cleanup Areas

Environmental and Community Report for the Week of October 12

View Last Week's Environmental and Community Report

With oversight from the U.S. Environmental Protection Agency (EPA), we are working to minimize the impact of construction on those who work, live, and spend time along the Duwamish Waterway. Stay informed about environmental monitoring and construction activities by viewing our weekly report linked above.

What to Expect During the Week of October 26

During the week of October 26, crews will be dredging at **sediment management area (SMA) 17**, near Duwamish Waterway Park. See the map linked above. We will continue to place clean material at **SMA 12A** and **12B**, which are near Duwamish River People's Park. In-water work is expected to begin as **early as 5:30 a.m.**, Monday through Saturday.

Cleanup work at **SMA 5** on the east bank will be done using equipment on the shore rather than on a barge on the water. This week, crews will be moving equipment to the

shoreline work area and preparing the work area for cleanup activities. Crews may begin removing non-native trees and bushes from the work area. This is needed to complete the bank cleanup at SMA 5. All non-native plants that we remove as part of the bank cleanup will be replaced by native plants in early spring once the work is complete.

What to Expect During the Week of November 2

During the week of November 2, crews will continue dredging at **SMA 17** and continue placing clean material at **SMA 12B**. Crews will continue preparing the site at **SMA 5**, including removal of non-native plants and debris. On-water work is expected to begin as **early as 5:30 a.m.**, Monday through Saturday.
