Cleanup Construction Activities

Season 3 construction of the upper reach, the two most upstream miles of the Lower Duwamish Waterway Superfund site, will continue through February 2027. In-water construction is limited to October 2026 through February 2027 to protect certain fish species.

Construction will occur on weekdays and Saturdays. It will occur during both the daytime and nighttime. Work hours will vary depending on tides and the type of work being done. Please note that in-water construction activities are dynamic and weather-dependent. All schedules are subject to change. **Visit LDWG.org for the most up-to-date information.**

If you have questions, or concerns, you can reach our team at info@ldwg.org or 1-888-561-LDWG (1-888-561-5394).

Environmental and Community Report for the Week of October 5

View Last Week's Environmental and Community Report

With oversight from the U.S. Environmental Protection Agency (EPA), we are working to minimize the impact of construction on those who work, live, and spend time along the Duwamish Waterway. Stay informed about environmental monitoring and construction activities by viewing our weekly report linked above.

What to Expect During the Week of October 19

During the week of October 19, crews will continue dredging at **sediment management area (SMA) 16.** We will be placing clean material at **SMA 12A** and **12B,** where dredging was previously completed. Work is expected to begin as **early as 5:30 a.m.**, Monday through Saturday.

What to Expect During the Week of October 26

During the week of October 26, crews will continue dredging at **SMA 16** and begin dredging at **SMA 17,** near Duwamish Waterway Park. We will continue to place clean material at **SMA 12B**. Crews will be mobilizing for work at **SMA 5**. Cleanup work at **SMA 5** will occur from the land at the shoreline rather than from a barge on the water. On-water work is expected to begin as **early as 5:30 a.m.**, Monday through Saturday.
