LOWER DUWAMISH WATERWAY GROUP

Stay Safe During Cleanup Construction

Construction is underway on the Lower Duwamish Waterway.
Follow these tips to stay safe and visible on the water:

- Stay at least 100 feet from construction boats and equipment.
- When passing, travel near the shoreline as far from active construction as possible.
- Follow crew directions and listen to announcements from the vessel.
- Expect brief access restrictions near active construction.

In-water work is limited to October – February to help protect certain fish species.
